

BABIES BENEFIT BY NEW SKIN DISCOVERY

Stops Itching Immediately, Soothes and Comforts the Little Ones.

A demonstration of the efficacy and entire harmlessness of poslam, the new skin discovery, is afforded when it is applied to the tender skin of infants who are tortured with rashes, chafings, scaly aggravations. Its effect is soothing, the itching stops at once, the skin heals and is quickly restored to normal condition. In the various forms of skin troubles in both infants and adults, poslam produces beneficial results from the first application. Eczema, acne, herpes, rash, tetter, etc., yield readily to its remarkable curative properties. Occasional applications will quickly banish pimples, blotches and complexion blemishes and will relieve and cure itching feet, scaly scalp, humors, etc.

Poslam can be had for fifty-cents at any reliable druggist's, particularly Lee & Osgood's and Smith's Drug Store in Norwich. Larue's in Putnam, Woodward's in Danielson and Chesbro's in Willimantic, who make a specialty of it. Or the Emergency Laboratories, No. 22 West 25th Street, New York City, will send a trial supply free by mail to any one who will write for it. This is sufficient to show results in 24 hours.

European Hair Schools

In Berlin, Paris, Vienna and other European cities there are now regular schools where the science of the hair is made a special study and the teachers in these schools become so skilled in the knowledge of hair that they can tell merely by the touch whether it is in a healthy condition or not. They also know the effects of different tonics on different hair or different restoratives on the same hair. It is thoroughly established that there is harm in the hair. All preparations claiming to restore gray hair are subjected to the most rigid tests. If found in the least degree harmful the public is informed through official bulletins issued from time to time. In America there is no such censorship, and many preparations claiming to restore gray hair are only temporary dyes that do not go to the root of the trouble, which is impoverishment of the hair glands. **HAIR HEALTH** in this country is recognized as the standard restorative for gray hair. All good druggists sell it at 25c and a dollar per bottle, or it can be purchased from the manufacturer, Philo Hair Specialists Co., Newark N. J., U. S. A.

INSPECTION OF LOCAL COMPANIES

Major Ellis of Fort Wright is the Army Officer named to Do Work for Government—Takes Place Next Tuesday.

On Thursday evening the Third company was busy getting ready for the inspection of the company next week, this being the regular quarterly inspection by an army officer. Both the Third and Fifth companies will be inspected next Tuesday evening, February 8, and it is necessary that every member be present and company orders to that effect have been issued. The inspecting officer will be Major Ellis of Fort Wright, and he will look over the entire equipment of each company, inspect them in their work, look through the blanket rolls, locker room and storerooms, as well as look over the company books. Both companies have been rolling blankets and getting in readiness for this visit. The inspection was by the inspector general of the Connecticut national guard and has nothing to do with this coming one.

The company members will have a busy time now getting down their decorations in the drill shed, the taking down and storing of the boxes as well as the large number of electric lights. As yet, the committee cannot tell what the company realized from their ball last week.

COAST ARTILLERY OFFICERS' COURSE OF INSTRUCTION

Must Be Taken by All to Qualify Them as Instructors of Enlisted Men Under Them.

To establish a uniform course of instruction, and to enable officers of the Coast artillery corps, Connecticut national guard, to qualify as instructors of the enlisted men under them, the following course, covering a period of three years, is adopted and will be taken up at once, and the commanding officer, Coast artillery corps, Connecticut national guard, is directed to issue the necessary orders carrying same into effect, according to general orders No. 3, issued by Adjutant General Cole.

First Year.—1. Service of the piece. (a) Duties of each member of the gun and ammunition section under all conditions. 2. Gun and carriage. (a) Nomenclature, purpose and action of several parts. (b) Packing stuffs, boxes and cleaning record. (c) Adjustment of quadrant elevation device, sight standard, throwing valve, check gear, elevating gear, gas cups, and firing mechanism. (d) Care and preservation. 3. Powder, projectiles, primers, fuses. (a) Ventilation of magazines. (b) Blending powder and preparation of charges. (c) Filling and fusing projectiles. (d) Painting projectiles. (e) Care of empty cartridge cases and primer bores. 4. Cordage, wire, shears, jacks, and use. 5. Camp hygiene. 6. Lectures on Coast artillery drill regulations. 2. Fire control system. (a) Detailed knowledge of system employed at the battery.

AT THE AUDITORIUM.

Vaudeville and Motion Pictures.

The usual change in the vaudeville bill at the Auditorium on Thursday furnished fine entertainment for well filled houses. Dan Dawson, the English character singer, leading in the popular favor as indicated by the applause received. Gladier Brothers, two musical comedy artists, hit responsive notes in their numbers. Nellie Lytton is a character change comedienne who pleases with her songs and imitations.

Arthur's dog and pony circus, which is the big act on the bill, is held over for the rest of the week and continues to delight everybody with the well trained animals and the clever snowing pony Rex. The solo and duet numbers by the Morelles are given with great skill and the varied subjects for the moving pictures make the entire bill pleasing to those attending.

S. A. R. BOOK.

New Haven Volume Will Contain Many Valuable Historical Papers.

At the annual meeting of David Humphrey branch, S. A. R., New Haven, Tuesday evening at the Foot Guard armory, following a supper, the committee on publication recommended that a book be published by the branch containing important historic papers, read at the various meetings, and a list of the Revolutionary soldiers who served in the war from New Haven, Derby, Ansonia, East Haven, Branford and other neighboring towns. The publication is also to contain the membership of the organization since its foundation in 1889 by Governor Harrison and General Greeley. It was voted to have the committee publish it and assess each member of the organization \$1 for a book.

For the Defenders' monument it was decided to appoint a committee to place a tablet on the monument, the movement being favored by General Greeley, president of the Monument association, who spoke of the work in glowing terms.

Following the business meeting a paper was read by Prof. C. L. Smith, LL. D., professor of American history at Yale, on Stephen Decatur and the Suppression of Piracy in the Mediterranean.

Vice Commander Wells told of his visit to Tripoli harbor after the Civil war. He has a piece of the historic vessel, the Philadelphia, at his home.

British Buying Cotton Lands.

Evenly discouraged by scant success in raising cotton in other parts of the world, British capital is turning to the southern states for investment in the industry of growing the cotton on a large scale. Before abandoning their efforts to find a considerable area adapted to cotton growing, the British capital who thus sought to make Lancashire independent of our cotton crop conducted experimental operations in every part of the world where the soil and climate seemed to hold out a promise of success. From time to time word came that the object sought had been attained, but these reports, like stories of phenomenal success in tea raising, at various points in the south, were found to be based on insufficient grounds. Neither cotton fields nor tea gardens could be made to yield remuneratively, and the large sums devoted to these purposes are all on the debit side of the ledger.

Now, the south has the lands on which to plant and pick at least twice as much cotton as it is doing, and enough besides to permit diversification of crops, and the wonder is that foreign capitalists seeking investments in that industry should choose to run great risks elsewhere rather than put their millions in a sure thing. It is not too late, however, to recoup their losses. The initial move in that direction is reported from Mississippi, where one of the largest and most productive plantations in the famous delta has been acquired by Liverpool investors at an outlay of \$350,000.—The Washington Post.

Where Reform Should Start.

Gov. Hughes thinks the big insurance companies should quit buying legislators. Primarily, however, the voters should see to it that the supply of purchasables is cut off.—Washington Herald.

(b) Indication and identification of targets. (c) Duties of each member of the range section under all conditions. (d) Emergency system and its salient points. 3. Fire control apparatus. (a) A detailed knowledge of adjustment and use of all fire control apparatus. (b) The general principles of application of the several corrections to be applied to the observed range to obtain the corrected range. (c) Effort on the flight of projectiles of variations in the density of air; the direction and velocity of wind. (d) Use of trial shots and application of data obtained from them. 5. Pointing. (a) Methods of pointing and pointing tests. (b) The telescope sight (the quadrant for mortars). (c) Bore sighting and orientation. (d) Emergency system and salient points.

Third Year.—1. General principles of coast defense. 2. Organization of coast artillery personnel and duties of separate commanders and mounting batteries. 3. Role of guns of different calibers and mortars. 4. An artillery inspection. 5. Characteristic features of the several classes of ships; general knowledge of local shipping; of channels leading to the harbor; and of ranges to prominent objects in the field of fire of the battery. 6. Conduct of subcaliber and service practice.

All officers of the Coast artillery corps are required to take this course, and at the close of each annual instruction period, examinations will be held, and the names of officers, who have attained such proficiency as to fit them for instructors, will be published in order. On successful completion of the entire course, a suitable certificate will be awarded. The qualifying mark at each annual examination shall not be less than an average of seventy-five per cent on the subjects under consideration. On application to the commanding officer, enlisted men, C. C. will be authorized to take this course, in such manner, and under such conditions, as the commanding officer may prescribe.

Commanding officers, Coast artillery corps, are directed to requisition one copy for each officer of The Service of Coast Artillery, by Capt. F. T. Tines, Coast artillery corps, and Maj. F. W. Ward, C. A. C. N. Y. This book, together with Drill Regulations for Coast Artillery, will provide all information required in the execution of the course outlined.

In general orders No. 7, amendments are made to paragraph 505, regulations Connecticut national guard, so as to read: The medal shall be worn with the full dress uniform, pendant from the neck, suspended by a ribbon from a bar of metal, passed through the upper ends, so that the medal proper will hang about the neck, the opening of the collar. Officers of the naval militia will wear it on the left breast, as prescribed in U. S. navy regulations.

HELPING HANDS WHIST.

Meeting at Home of Rev. and Mrs. A. P. Blinn, in Oak Street.

At the home of Rev. and Mrs. Albert P. Blinn, in Oak street, the Helping Hands held a most enjoyable whist Thursday evening, seven tables being played. The prizes were: First, Mrs. William R. Balcorn, lady's traveling case. Rev. Albert P. Blinn, silver-plated snuff box. Second, Mrs. E. R. Tuttle, Refreshments of cake and coffee were served.

Next Thursday night a rubber social is to be held at the church, and because of this the whist played has been postponed until Feb. 24, when Mr. and Mrs. William F. Bogue of Broad street will entertain.

TRAILING A FISH.

Diamond Stealing Trout Is Tracked from Nebraska to New York With Results.

"I came east on the trail of a fish," remarked Jean Devereaux, a business man of Omaha, last night at the Grand Central station.

"It was like this. Last summer I went fishing in Cut-Off lake, north of Omaha, at one time a part of the Missouri river. I caught a big trout. How that trout got in Cut-Off lake is a mystery, because trout are scarce in that whole section of the country. I knew, however, that I had made my friends believe me when I told them I caught the trout in the lake was to take it home alive.

"I tied a string to the trout's tail and fastened it to a seat in the boat. Then with my hat I dipped up enough water to half fill the bear, and I poured it over the trout. As I changed the trout from can to can to keep him in fresh water.

"At home my wife had the bathtub filled with water and we dumped the trout into the tub. We kept that fish in our bathtub until a week ago, when the neighbors began to knock because we had to go to their houses every time either one of us wanted a bath. So we decided to ship the fish to a friend of mine here in New York.

"Would you believe it? My wife cried when I sent that trout away. You see, it had become so tame that it would eat out of her hand. Now it was on account of this habit of his that all our subsequent trouble came from it.

"Just half an hour before I put the fish in the tank to ship it away my wife went to the bathroom to take the fish. In her grief she forgot to take it any bread and when she put her hand in the tub to pat it on the head she found that one of the diamonds in her ring was missing. She didn't tell me about the trout stealing the stone until I came home on my way to New York.

"I telegraphed to my New York friend not to dispose of the fish until I arrived. I got here yesterday, just in time for the autopsy. There in the trout's mouth, caught in its gills, was the diamond from my wife's ring."

Twain and the Turk.

Mark Twain, when he worked in Nevada on The Virginia City Enterprise, inserted in the news a good many boarding house jokes.

In revenge, the humorist's sensitive fellow boarders in Virginia City decided to put up a game on him. They enlisted the landlady's help at the Thanksgiving dinner, at the boarding house Mark Twain by a dexterous piece of slight-of-hand, was served, apparently direct from the fowl, with a turkey leg of painted wood.

"You've changed your poultry dealer, haven't you, ma'am?"

"Why no, Mr. Clemmings. What makes you think so?"

"This turkey," he answered, giving the wooden drumstick a little kick with his knife, "it's about the tenderest morsel I've struck in this house for some months."—Detroit Free Press.

STATE POMOLOGICAL SOCIETY HOLDS 19TH MEETING.

Addresses and Reports—Parcel Post Favored—Officers Elected.

The second day's session of the 19th annual meeting of the Connecticut pomological society, at Hartford, was opened at 10 o'clock Thursday morning with President Charles L. Gold of West Cornwall in the chair. The attendance was about 400.

James L. Cowles of Farmington

spoke on the parcels post, and made an impassioned plea for postal reform. Secretary H. C. C. Miles of Milford read his report. Treasurer Orrin S. Gilbert of Middletown presented his report, a summary of which is given below.

RECEIPTS.

Feb. 4, 1909, balance..... \$177.53

Annual membership fees..... \$18.00

Appropriations..... 1,550.00

Other sources..... 335.05

Total..... \$2,584.02

PAYMENTS.

Expenditures..... \$2,435.79

Balance Feb. 1, 1910..... 148.23

Total..... \$2,584.02

For the special account of the New England fruit show the treasurer received \$1,048.54, all of which was expended. The invested funds in the Berlin Savings bank amount to \$257.58.

Prof. W. M. Scott of the United States department of agriculture made an address on The Use of Lime-Sulphur Mixtures in Controlling Apple Diseases.

An address on The Present and Future of Connecticut Peach Growing was made by Charles B. Tillinghast of Middletown. He sketched the conditions of the peach industry in a comprehensive manner, and the conclusions of his address answered many questions.

The afternoon session began at 2 o'clock. The first item on the agenda was the report of the nominating committee, which presented the list of names for officers as follows:

President—Elijah Rogers, Southington.

Vice president—George A. Drew, Greenwich.

Secretary—H. C. C. Miles, Milford.

Treasurer—Orrin S. Gilbert, Middletown.

County vice presidents—Hartford, L. C. Root, Farmington; New Haven, A. T. Henry, Wallingford; Fairfield, S. S. Phelps, Salisbury; Middlesex, J. W. Spicer, Deep River; New London, W. I. Allen, Ledyard; Windham, E. E. Brown, Pomfret; Tolland, John R. Houston, Mansfield.

The report was accepted and the above elected.

A resolution prepared by James L. Cowles of Farmington was presented. It was in substance that the society request congress to provide a parcels post service, "as extended and cheap as that of any other country in the world;" that a copy be sent to the Connecticut delegation in congress and to John W. Weeks, chairman of the postal committee of the house of representatives; that all other agricultural associations in the country be urged to request their representatives to pass the bill. The resolution was passed.

An address on How to Increase the Profit from Berries and Market Garden Crops was made by Alva T. Stevens of the horticultural department of the Connecticut agricultural college. Robert Thomas of St. Catherine's, Ontario, Canada, spoke of the successful operation in the Handling of Fruit Crops.

In the apple awards E. E. Brown of Pomfret got first on Newton Pippins and second on Northern Spy.

Somers.—Mrs. Henry R. Kibbe, Mrs. Anna Kibbe and Mr. and Mrs. Ernest S. Fuller left Thursday on an excursion to California by the southern route. They will be absent until the last of March.

CAR BALKED.

Woman Passenger Had to Walk Two Miles—Now Sues Road.

Because the trolley car refused to go further, and because she had to tramp two miles to her home through the darkness, Mary Elizabeth Charter of Danbury has brought suit for \$2,500 against the Danbury and Bethel Street Railway company. Mrs. Charter stated that on Sept. 12, 1909, she boarded a car of the company at Lake Kenosia, intending to go to her home in Danbury. At Bacchus Corner the trolley pole went off the wire, the car went off the track, the wires fell down, the lights went out and a current of electricity went through the car, giving her a severe fright and a physical and mental shock. She was in a high state of nervousness at the time, and has been so ever since. The car was unable to go forward. It was after sunset and dark. She with a number of other passengers in the car were therefore obliged to walk, and she a distance of two miles to her home.

The Simple Life.

It is seldom that a physician succeeds in proving his theories by not dying before reaching the great age of 91. This feat is the more remarkable when his theories are opposed to all commonly accepted ideas.

Dr. George S. Keith, who has just died at Currie, near Edinburgh, aged 91, was known as "the starving doctor" and was much criticized for his almost complete abandonment of medicine, his condemnation of alcohol, and his attacks on the "keep up the strength of the patient" school.

Dr. Keith started his patients by his ideas. "Don't eat anything," he would tell them, "but go to bed, open the win-

down and drink plenty of good water." He scarcely ever prescribed medicine of any kind, and never alcohol. "In illness," he said, "neither medicine nor alcoholic stimulants nor food are necessary as a general rule, and are often absolutely injurious." His great idea was that nearly every illness could be traced to overeating.—Boston Globe.

Must Show Pinchot.
A contemporary says the president has substituted the whitewash brush for the big stick. We are not disputing it, but somebody will have to show Pinchot.—Houston Post.

Confirming Their Opinion.
A perusal of Upton Sinclair's "novel," "The Jungle," is recommended as a fortification to the anti-meat eaters in their resolution.—St. Louis Globe-Democrat.
